

Software Deployment

Are you upgrading to the latest software version or hardware platform and need a training program to bring your workforce up to speed? At **CFC**, we have the experience and know-how to support your new product deployment plans.

Our deployment training solutions look at:

- Number of trainees
- Distribution of trainees -- local versus global
- Timeline to complete training
- Availability of trainers -- internal and outsourced
- Delivery methodologies -- instructor-led, WBT, self-study, CBT
- Classroom availability -- When? Where? Size?
- Technology support -- classroom equipment, hardware, software
- Cost versus Return on Investment

Cynthia Farren Consulting has the expertise to develop training plans and strategies that get the job done efficiently and effectively while minimizing the disruption to your business. We will partner with you to ensure that your workforce learns the new skills necessary to be successful right now as well as moving forward.
