

Staff Augmentation

Cynthia Farren Consulting offers staff augmentation services to assist your business when your current employees are over-extended, or to fill specific needs for a project where you do not have the necessary skill sets on staff. Our professional, highly qualified employees and consultants possess the certifications, experience, and customer service skills to come in and do the job for you, quickly and professionally.

We offer technical and project management personnel for short and long-term engagements, projects, internal systems administration, and technology delivery at every level.

We retain a core team of top-flight IT professionals including:

- Software Specialists
- Project Coordinators
- Trainers
- Designers
- Writers
- Editors
- Testers
- QA Analysts

Outsourcing permits your organization to redirect its resources, specifically its people resources, from non-core activities back to your company's primary business. Bringing in outsourced staff allows you the freedom to focus your regular personnel on your core business initiatives.

CFC outsourcing is the perfect solution for your technology staff augmentation needs. And best of all, by maintaining a very low overhead, **Cynthia Farren Consulting** remains very affordable... with some of the lowest rates in the market. But affordable doesn't mean second best; quite the opposite. We're confident that you'll find **CFC** personnel to be some of the best IT specialists you've ever worked with.

Contact **Cynthia Farren Consulting** for more information about how our outsourcing contracts can help accomplish your company's IT goals and objectives with the efficient use of your organization's resources.
